

# Hot Tub Cover Measuring Guide

Made by the world's leading hot tub cover manufacturer and used by many OEM's our covers are unmatched for quality construction and durability. Utilising the very best Marine Grade Vinyl and Polyester thread, combined with high density EP foam cores that are wrapped in a 6 mil vapour resistant barrier film to reduce water absorption - Our covers are designed to look good and last.

These easy to follow instructions will guarantee that your new replacement hot tub spa cover will be a perfect fit.

## Do I measure my cover or my spa?

If the cover is a good fit and it is NOT waterlogged, warped, or deformed in any way, you could measure the cover and then check this against the actual spa measurements.

Your cover should be slightly larger than the exact dimensions of the hot tub or spa to allow it to be positioned easily.

We guarantee your cover will be manufactured to within 2cm of the measurements you give us.

## IMPORTANT - PLEASE NOTE BELOW:

If we make a mistake, we take responsibility for it and replace your cover free of charge.

If you make a mistake, you'll be responsible for it because we cannot modify a made cover.

**PLEASE DOUBLE CHECK YOUR MEASUREMENTS!!** - And always round up to the nearest 1cm.

## What do I measure?

**First - Print Page 3 of this guide to record your measurements.**

Then start with the overhead dimensions of the spa shell, or shelf, based on the type that best matches your own, as shown below:

## Hot Tub Cover Measuring Guide - continued

Now you need to measure:

### The Skirt Length

To prevent failure of the exposed acrylic due to UV damage a skirt or flap of vinyl is added to the bottom of the cover so it is important that this is long enough to cover it comfortably. If your spa has a rail or ledge between the acrylic and cabinet this performs and look better if you extend it past this, just make sure you measure the cover wide enough so that the skirt can hang straight down.

### The Cover Safety Straps

All our covers are supplied with safety straps, this is part of the ASTM safety approval, they also come complete with new strap locks and fixings to ensure the cover can be secured properly.

Please measure the length of the cover safety straps from the bottom of the cover to where the strap meets the clip (don't include the clip itself). If your spa is built-in, or mounted into a deck the straps can be just 2.5cm long if required.

***The straps are always positioned on and opposite Dimension B***

### The Corner Radius

If your spa has rounded corners, you will need to measure the corner radius, if you have a carpenter's square this is straightforward, if you don't, then the easy use way to do it is put a straight edge (a broom handle or piece of wood will be fine) against one side and a ruler or tape measure from this to the start of the radius. Alternatively, **Print out Page 4** and use our radius indicator template that can be positioned over the rounded corner of the hot tub cover to give you a fairly accurate measurement for the radius.

***If you are doubt about this dimension always favour a smaller radius to guarantee a good fit.***

### Choose Your Colour

This is the nice easy bit, just choose from the selection below, but please bear in mind you are looking at a computer screen and not an artists palette, the colours are a good approximation of what you will receive.

**Bourbon**

**Oxen**

**Walnut**

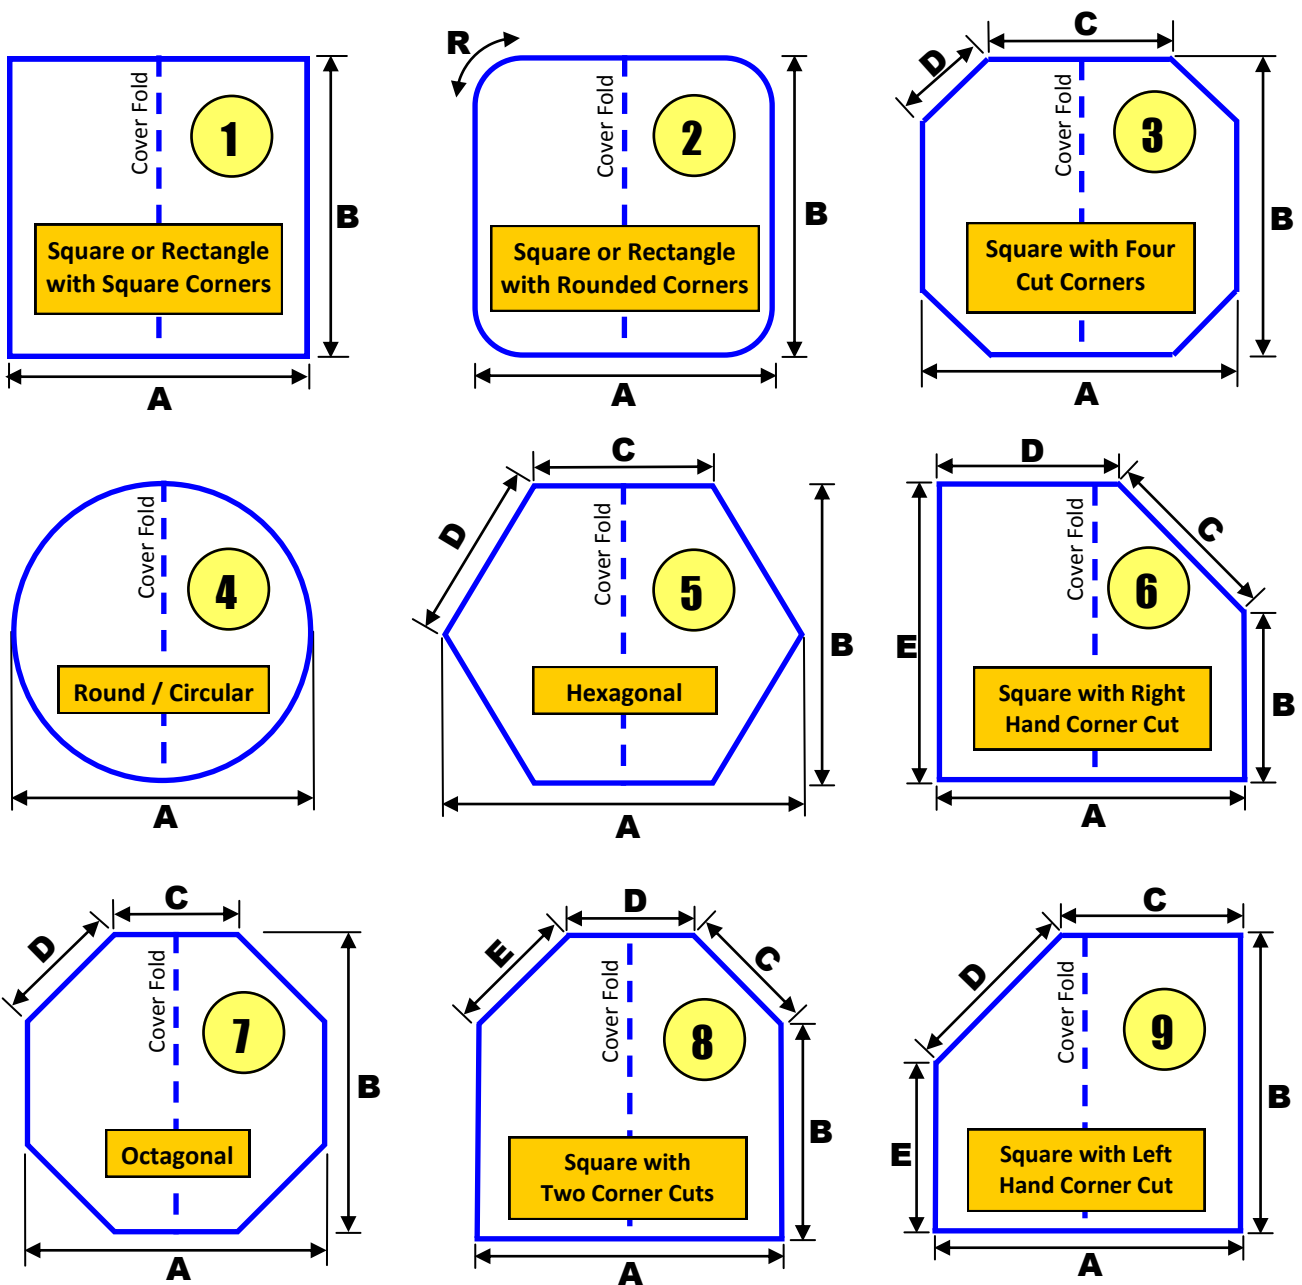

**Grey**

**Black**

## Hot Tub Cover Measuring Guide - continued

choose from the shapes shown below that most closely matches the style of cover you require:

**PLEASE NOTE:** The dotted line represents the “Cover Fold” and this cuts Dimension “A” in half, it is usually the longest dimension but even if it is not please **always measure this as Dimension A.**

Style No.	Dimension A	Dimension B	Dimension C	Dimension D	Dimension E
	cm.	cm.	cm.	cm.	cm.

Corner Radius R	Strap Length	Skirt Length	Colour
cm.	cm.	cm.

Your Signature Please	Telephone Number

## Spa Cover Radius Template

Print off this sheet and position on the cover corner.

**PLEASE NOTE:** If you can't make up your mind which radius to choose, **ALWAYS** go for a smaller measurement to guarantee your new cover will fit.
